Integrated Slotted Barrel for PostMaster Plus Posts

TITAN PGD3200XPM DRIVER

With the versatility of the Titan PGD3200XPM Post Driver powered by the Honda GX35 Four Stroke engine, you can drive posts from the PostMaster Plus to a ground rod, and multiple sizes in between with Titan's broad assortment of solid industrial poly sleeves and quick-change barrel cap. The PGD3200XPM also accepts extended handle kits for taller post installation.

Titan handle kits provide an offset, cushion grip handle and throttle assembly with on-off auto reset button and trigger throttle. Hardened steel bolts with Nord-Lock washers combined with knurled couplings provide strong, tight connections. A throttle junction box and quick connect wire harness allow for dual throttle control. **Handle kits are purchased and shipped separately and must be installed.**

When driving the PostMaster Plus, the PGDPMDC hardened steel, die cut, barrel sleeve must be used to properly guide the post and reduce damage to the top of the post.

*Driver shown with 15" Throttle Extension Kit (PGDSHKX) and Upper Handle Kit (PGDLHKX) Installed
